

TREND MICRO INC.

Innovation and Leadership in Secure Content and Threat Management

CORPORATE FACT SHEET

Trend Micro Incorporated is a pioneer in secure content and threat management. Founded in 1988, Trend Micro provides individuals and organizations of all sizes with award-winning security software, hardware, and services. By delivering timely intelligence and customer-driven innovations that seamlessly integrate with the network information flow, Trend Micro safeguards operational continuity with comprehensive protection against the expanding range of threats that endanger business operations, personal information, and property. As a result, organizations and individuals can be confident in the security and integrity of their digital information.

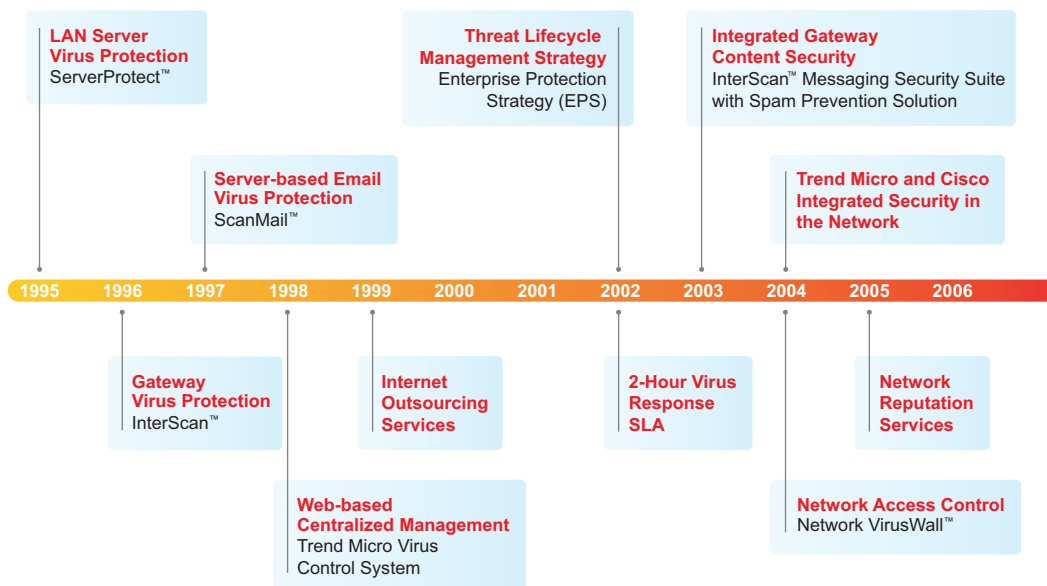

A Pioneer in Innovative Technologies

Since its inception, Trend Micro has consistently been at the forefront of secure content and threat management with technology advances that protect customers from emerging threats. Trend Micro's innovations include:

- The first antivirus protection at the Internet gateway
- The first centralized Web-based management console for antivirus products
- The first antivirus protection for email and file servers
- The first comprehensive, customer-centric approach for managing the complete threat lifecycle

And, through strategic partnerships with technology leaders like Cisco Systems, Trend Micro continues its leadership position as the first security vendor to integrate threat management technology and expertise directly into the network information flow.

Building on a history of industry firsts, Trend Micro's latest technology innovations include extending protection into the network itself.

Timely Threat Intelligence and Rapid Response

Comprehensive protection requires more than just security hardware and software products—it also demands expert service and rapid deployment of intelligence about new threats. Through TrendLabsSM, a global network of threat research and product service and support centers, Trend Micro offers continuous round-the-clock coverage to customers around the world. More than 800 engineers, researchers, and support personnel in 15 dedicated service centers around the globe monitor potential security threats and mount rapid responses to major security incidents and urgent support requests.

As new threats emerge, Trend Micro will maintain its commitment to timely threat intelligence and ongoing technological innovation to help customers minimize damage, reduce costs, and safeguard continuity in the face of increasing and shifting security threats.

Innovative, Customer-Focused Solutions from an Industry Leader

To keep pace with the growing range of malicious threats, comprehensive data and content security requires more than simply securing desktop and gateway computers—the overall security paradigm must constantly evolve to anticipate and address new kinds of malicious code. Through deep integration with the network infrastructure and new technologies including next-generation IP filtering, network content inspection, network access control, and more, Trend Micro secures both the network infrastructure and individual machines.

Trend Micro'sTM Enterprise Protection Strategy (EPS) combines multiple layers of products and services to deliver intelligent, comprehensive protection against known and unknown threats. With comprehensive support for monitoring, enforcement, prevention, and recovery and a single centralized management console to simplify and reduce administrative burden, EPS enables large organizations to successfully guard every point in the network.

To meet the needs of smaller organizations, Trend Micro offers comprehensive solutions that deliver automatic threat protection, all-in-one integrated defense, and reduced administration functionality. Available in a variety of form factors, these solutions ensure a worry-free infrastructure that minimizes security administration so customers can stay focused on their business.

For home and home-office users, Trend Micro offers a range of security products that protect against viruses, spam, spyware, worms, Trojans, hackers and more to provide security for personal systems and information.

For More Information

With headquarters in Tokyo and operations in more than 30 countries, Trend Micro solutions are sold through corporate and value-added resellers and service providers worldwide.
